2.

- To fell what is believed to be a Goat Willow (may be a hybrid) immediately alongside the road and drive of 4 Wheatleys Close. The willow is detrimental to the beech hedge below it (beech hedges are a characteristic of the village), reduces light to the front of the property, restricts access into the drive, interferes with cables to neighbouring properties, but primarily, because when the wind blows, the ground at the base of the tree can be seen to move. To the NE (drive) and SE (road) there is a drop in the level of the ground reducing the support at the base of the tree. It is not intended to plant a replacement tree due to lack of a suitable location in the garden following the earlier planting of other trees. The Goat Willow is estimated to be 10m high. It is about 25 years old having grown from a self seeded sapling since we moved here. 4 Wheatleys Close Steventon Basingstoke Hampshire RG25 3BQ
